

# NOT ALL FAUX WOOD BLINDS ARE THE SAME

## A SIDE BY SIDE COMPARISON OF COMMON PRODUCTS IN TODAY'S MARKET PLACE

**STOCK/CUTDOWN BLIND**

**CUSTOM FAUX WINDOW BLIND**

Not made to exact size of window-several widths, 12" height increments

Custom made to size within 1/8" on width AND height

Comes with Wand Tilt only under current guidelines

Available in Wand or Cord Tilt

Extra slats at bottom mean more weight and pressure on headrail

Less slats will make it lighter than stock/cutdown blind

PVC Headrail—flexible

Steel Headrail—Rigid, Sturdy

Plastic valance clips

Metal Valance Clips

1 Color Only

Multiple Colors from which to choose

72" Max Width-openings larger than 72" will have separate blinds and separate valances

Openings wider than 72" will be made as multiple blinds on 1 headrail, with 1 continuous valance

Rectangular bottom rail for fair closure at bottom of window

Trapezoid bottom rail for tightest closure at bottom of window

Blinds built in China

Blinds built in the USA

All Stock/Cutdowns MUST have cordless lift per ANSI standards

Custom blinds can be built with or without cord lifts per ANSI standards

Big Boxes typically have best pricing on this style of blind

Custom blind pricing can vary by the dealer/manufacturer
